Subject: REACH Declaration

Dear Valued Customer,

REACH is a European Community Regulation on chemicals and their safe use (EU Regulation No. 1907/2006). It deals with the Registration, Evaluation, Authorization, and Restriction of Chemical substances. Barbosa World Brass, S.A. supports the aim of REACH in improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

Barbosa World Brass, S.A. is fulfilling our obligations under the REACH Regulation, specifically those obligations related to registration, notification and / or communication requirements related to substances contained in the metallic products that we supply identified as "articles. These articles have no intended release, as outlined in the European Chemical Agency's 'Guidance on requirements for substances in articles', and therefore, we have no registration obligation under REACH for them.

However, if an article has a substance of very high concern (SVHC) above stipulated concentration, then this SVHC must be disclosed to our customer. Our products contain, to the best of our knowledge, none of the substances on the latest candidate list of Substances of Very High Concern (SVHC) or the maximum concentration values for such substances in homogenous materials are far below the 0.1% regulatory limit (w/w). We will continue to monitor that list as it is updated.

Sales has informed all our metal suppliers of the REACH Regulation. Compliance to the regulation of the metal we supply is controlled through our purchase order requirements, requiring a compliance statement to be listed on material's test report.

We will continue to work with our vendors to determine how the REACH requirements will impact our business.

Please do not hesitate to contact us should you have of any questions. We will be happy to share our expertise and data with you.
